

# Ohio State eFields Research Checklist

## Pre-Planting

- |                                     |
|-------------------------------------|
| Meet with cooperator                |
| Generate plot layout                |
| Complete plot information worksheet |

## Post-Planting

- |   |
|---|
| Upload plot information worksheet to BuckeyeBox |
| Upload planting as-applied data to BuckeyeBox   |

## In-Season

- |  |
|--|
| Take field observations  |
| Complete stand counts  |
| Keep record of crop management (i.e., herbicides, fungicides, insecticides, fertilization) |
| Look for information about suggested scouting or data collection                           |
| Report observations on weekly C.O.R.N conference call                                      |

## Harvest

- |   |
|---|
| Properly calibrate the yield monitor                        |
| Complete harvest worksheet                                  |
| Collect a sample and record grain moisture for each plot    |
| Take notes about condition of crop and observable variation |

## Post-Harvest

- |   |
|---|
| Upload in-season data collected to BuckeyeBox     |
| Upload harvest worksheet to BuckeyeBox            |
| Upload harvest file to BuckeyeBox                 |
| Generate county report and submit for peer-review |
| Thank your cooperator and ask about next year!    |
